

# Gregory Kaframanis

Frontend Software Engineer | React, TypeScript, Next.js, React Native

Lamia, Greece | Phone: +30 6981308331 | gkaframanis@gmail.com

GitHub: <https://github.com/gkaframanis> | LinkedIn: <https://linkedin.com/in/gkaframanis>

## Professional Summary

Frontend Software Engineer with 4+ years of experience building scalable web applications using React and TypeScript. Proven experience in delivering enterprise-grade solutions within large-scale systems, focusing on performance, maintainability, and user experience.

Strong understanding of state management, asynchronous data handling, and API integration, with additional experience in React Native and modern frontend tooling.

## Professional Experience

### Frontend Software Engineer

Dec 2021 - Present

*Netcompany | Athens, Greece / Remote*

- Developed and maintained large-scale frontend applications using React and TypeScript within enterprise environments
- Implemented complex state management logic using Redux Toolkit and RTK Query
- Integrated REST APIs and handled asynchronous workflows across multiple application layers
- Collaborated with backend teams to design and consume APIs in distributed systems
- Contributed to performance optimizations, debugging, and production issue resolution
- Participated in Agile development processes, including code reviews and sprint planning

### Selected client projects

- Ecommbx - Contributed to banking application development using React, TypeScript, and React Context.
- Vodafone Hellas - Supported legacy-to-modern website migration using Next.js, Contentful CMS, and GraphQL.
- MyPlanner - Worked on internal HR workflows including seat and parking reservations using React and Context API.
- MyNetGo (Cosmote) - Contributed to mobile application features and design-system-related work using React Native and Redux-Saga.
- MyDEDDHE (HEDNO) - Developed frontend functionality for electricity service request workflows using React, Redux Toolkit, and React Router.

### Independent Frontend Projects & Web Support

2020 - 2021

*Self-directed | Remote*

- Developed highly interactive frontend applications focusing on modern UI architecture, state management, and third-party API integrations.

### Web Developer

Jul 2018 - 2020

*Civilshop | Lamia, Greece*

- Maintained the corporate website, managed internal data updates, and provided day-to-day technical troubleshooting for client-facing issues.

## Education

### MSc in Information Systems and Services, Specialization in Big Data and Analytics

University of Piraeus | Piraeus, Greece

*In Progress*

### BSc in Computer Science and Biomedical Informatics

University of Thessaly | Lamia, Greece

2014 - 2020

Thesis: Development of a platform to ensure privacy in IoT environments using Python, Django, MySQL, HTML, and Bootstrap.

## Technical Skills

- **Frontend:** React, TypeScript, JavaScript (ES6+)
- **State Management:** Redux Toolkit, RTK Query, Context API
- **Tools & Libraries:** Axios, React Router
- **Mobile:** React Native
- **Other:** REST APIs, Git, Agile methodologies
